Fernando Zavala, Software Developer

After highschool, I followed my passion for programming by taking online courses in Full Stack Development. I enjoy solving problems and find satisfaction in discovering solutions. My primary technology stack includes React, Next.js, TypeScript, and Angular. I am eager to learn about new technologies and am currently seeking a full-time position as a Full Stack Developer.

Employment History

Bentobox, Remote

July 2024 — Present

I work with the Design team and other developers in sprints to build attractive landing pages and easy-to-use online shopping solutions, as well as point-of-sale systems for restaurants. My aim is to help these businesses set up a strong online presence. I also sometimes help improve the company's CRM, allowing restaurant owners to easily update and manage their own websites I use technologies like React, typescript, CSS grid

Freelancer, San Pedro Sula

January 2024 — July 2024

Have gained experience as a freelancer working with several startups. For example, I developed the main website from scratch for the World Bushido Federation, a martial arts academy. I also incorporated a small eCommerce section to sell products and subscriptions using technologies such as Next.js, JavaScript, SASS, and Stripe.

Another project I worked on was a platform for an English academy that allows students to upload homework and projects, stay updated, and enables teachers to assign new tasks, homework, and schedule events. This project utilized Next.js, Tailwind CSS, Node.js, and PostgreSQL.

Additionally, I built the main website for URUZ Software Solutions, a SaaS platform that features a marketplace for various software solutions across different industries.

Flores Group, San Pedro Sula, Honduras

January 2022 — January 2024

During my time at Flores Group as a Full Stack Developer, I had the opportunity to contribute to a meaningful campaign supporting startups, restaurants, and other businesses. I crafted mobile apps with React Native, Expo, and Firebase, while also designing impactful landing pages and web applications for diverse clients using technologies like React, Next.js, Laravel, and TypeScript. Each project was a step toward empowering those who dare to dream big.

Emanu International, Villanueva, Honduras

May 2020 — November 2021

My first experience was at Emanú International as Full Stack Developer where I developed their main website and also their internal tools using technologies such as: ~~React~~, NextJS, NodeJS and PostgreSQL. —————

Also I did use technologies such as: C#, MSQl Server and layered structured to develop a Point Of Sale system desktop app for a store they have.

Education

Bachillerato Técnico Profesional en Informática, Unión Y Esfuerzo, Villanueva

Inst. Oficial

February 2013 — February 2019

Full Stack Developer, Udemy, Online

February 2020 — December 2019

Ingeniería en computación, Universidad Tecnológica de Honduras

December 2023 — Present

I am currently studying computer engineering at the university.
